**Hazardous Materials that Require EHS Pre Approval**

The following hazardous materials require EHS pre-approval and must be requested through hazardous materials purchase form and purchase requisition/purchase order; a procurement card may not be used to purchase these identified hazardous materials

a) DEA regulated Chemicals - a regulated drug that has been placed on a schedule of controlled substances by the state of California
b) Radioactive materials - any and all substances and materials, the handling of which requires approval, consent, permit, or license from the Nuclear Regulatory Commission and any handling of substances & materials that requires a radioactive material license or other similar approval, consent, permit, or license from the state of California
c) Biological Agents Used in Research - microbes including bacterium and viruses associated with human diseases
d) Recombinant and/or Synthetic DNA - naturally occurring or synthetic molecules that are constructed by joining nucleic acid molecules (This includes rDNA extraction kits)
e) All human and primate tissues or culture cell lines and animal/insect tissue or culture cell lines that have been exposed to infectious agents
f) Flammable liquids - flashpoint of < 100 C - purchases > 10 gallons
g) Pyrophorics - able to spontaneously ignite in air - purchase of any amount
h) Compressed gasses - purchases of additional amounts not currently inventoried
i) Cryogenic liquids - purchases of additional amounts currently not inventoried water reactive
j) Corrosive liquids - purchase of > 15 gallons
